The Term 1 PoC project is finalised.

Problems

- Do Xuan Bach's work was unfortunately not of good quality, therefore Andrei had to redo most of his work.

Future Plan

- Work on the project will continue over the Christmas break as well as Term 2 as our client would like the Application to be ready sooner than the module deadlines.
- Term 2 PoC plan uploaded on Team Website

Individual reports

Do Xuan Bach

This week I contributed to the documentation of the project, that including summarising client's requirement, logging researches that we've covered and use cases for our system.

Andrei Mircea Boscor

I finished building an HTML5, CSS3, Javascript prototype for the App and also ran various tests on different devices to check it's compatibility with Phonegap Developer. I redid the Research Documentation, corrected the Use Cases and Requirements done by Bach. Furthermore, I changed the template of the team website and the outline to better suit our project. I also posted all the information to the Website. Finally, I created the team video.
